Research & clinical trials

Participating in key industry clinical trials, including those evaluating new testing platforms for diseases such as Chagas, Memorial Blood Centers is among the pioneers in this rapidly evolving industry.

A trusted partner in clinical trials

Memorial Blood Centers' advanced facilities and knowledgable staff provide quality products, expert consulting and experience in conducting clinical trials. FDA licensed and EU compliant, we ensure a safe and stable blood supply, advance the scientific study of infectious diseases, and set the standard for the blood industry.

National leadership in clinical trials and research to advance blood safety

Memorial Blood Centers continually strives to advance the scientific study of new techniques and technologies for the blood industry. Our highly skilled staff collaborates with clients to capture every detail of the study's requirements, including protocol design. We have extensive experience working closely with the IRB to ensure proper study oversight of a variety of projects, including:

- Validating new disease markers
- Evaluating transfusion collection devices
- Researching better ways to ensure blood safety
- Patient testing with new reagents

Expect more for your clinical trials

Our dedicated staff has extensive experience in managing clinical trials. Our expertise includes:

- Human subjects' protection
- IRB submissions
- Protocol development
- Developing informed consent documents and other study materials
- Obtaining consent and administering questionnaires

MBC uses an AAHRPP accredited Independent Review Board that has 25 years of experience, with a typical IRB review time of less than a week!

We have helped many clients in obtaining FDA licensure. We are cGMP compliant and hold a Federal Wide Assurance.

About Memorial Blood Centers

With over 65 years of experience collecting, testing, and distributing more that 3 million units of blood, Memorial Blood centers continues to be recognized as a leading, independent nonprofit providing blood products and biomedical expertise that save and sustain lives.

When experience and expertise matter most, trust Memorial Blood Centers
